

Using Your RxSaveCard for Weight Management Medications

Atlantic Packaging is committed to supporting your health goals by contributing funds toward the cost of GLP-1 weight loss medications at eligible online pharmacies — you pay **\$25** toward each transaction, and **Atlantic Packaging** covers the rest!

What is RxSaveCard?

RxSaveCard is a virtual payment method that gives you access to eligible weight loss medications for a fixed monthly cost — your employer automatically covers the rest. Use your card number, expiration date, and security code at checkout with LillyDirect, NovoCare, or Amazon Pharmacy.

Available Medications & Pharmacies

Medication	Estimated Cost at Pharmacy Checkout*	Personal Funds Needed	Amazon (Self-Pay)	LillyDirect (Self-Pay)	NovoCare (Self-Pay)
Foundayo 0.8 mg - 17.2 mg	\$149 – \$299	\$25/mo	✓	—	—
Wegovy Pen 0.25mg – 7.2mg	\$149 – \$399	\$25/mo	✓	—	✓
Wegovy Pill 1.5mg – 25mg	\$149 – \$299	\$25/mo	✓	—	✓
Zepbound KwikPen 2.5mg – 15mg	\$299 – \$449	\$25/mo	✓	✓	—
Zepbound Vial 2.5mg – 15mg	\$299 – \$449	\$25/mo	—	✓	—
Zepbound Auto-Injector	—	—	✗	✗	—

At checkout, always choose self-pay or buy without insurance — RxSaveCard cannot be used with insurance.

* Pharmacy checkout prices are estimates and may vary by dose, product form, channel, taxes, and state of residence. Regardless of the exact pricing at the pharmacy, your personal contribution required per transaction will not change unless you are notified that an update has been made to your program.

* Employer contributions cover your balance beyond your fixed personal contribution, up to per-transaction and monthly maximums. Coverage applies to eligible GLP-1 weight loss medications at participating pharmacies only (listed above).

✗ Sold at this pharmacy, but not eligible for purchase with RxSaveCard.

Which Pharmacy Should I Choose?

Amazon Pharmacy

Foundayo · Wegovy pill and pen · Zepbound KwikPen

Ask your doctor to send your prescription to:

Amazon.com - Amazon Pharmacy
Nationwide Home Delivery

NPI: Varies | NCPDP: Varies

Support: 855.206.3605

LillyDirect

Zepbound vial · Zepbound KwikPen

Ask your doctor to send your prescription to:

LillyDirect Pharmacy

NPI: 1912889320 | NCPDP: 1574056

Support: 844.559.3471

NovoCare

Wegovy pen · Wegovy pill

Ask your doctor to send your prescription to:

NovoCare Pharmacy

NPI: 1710671854 | NCPDP: 5758074

Support: 833.949.5527

How to Get Started

1 Talk to Your Provider

Discuss whether GLP-1 treatment is right for you and which medication and pharmacy option fits your prescription (Zepbound, Wegovy, or Foundayo).

Important: Your provider must send your prescription to the correct pharmacy (LillyDirect, NovoCare, or Amazon Pharmacy) based on your medication.

2 Receive Prescription Confirmation

After your provider sends your prescription, you will receive a confirmation via email or text within 24–48 hours with next steps to complete your order.

3 Activate Your RxSaveCard

Activate your RxSaveCard account and access your virtual card for checkout.

Already activated? Log in to your RxSaveCard Dashboard to view your card details and available funds.

4 Pay with Your RxSaveCard

Before placing your order, log in to your RxSaveCard dashboard and add your fixed \$25/mo member cost to your card. Then at checkout, enter your Card Number, Expiration Date, and Security Code, along with your billing zip code — your employer's contribution will be applied automatically to cover the rest.

Please Note: Your RxSaveCard is virtual and only works for online orders with home delivery—not for in-store pickup, even if that option appears at checkout.

5 Your Medication is Delivered to You!

Your medication ships directly to your door. Delivery times vary by pharmacy.

What to Expect Each Month

Employer Funds Apply Automatically

Your employer contribution is calculated automatically based on your checkout total — you always pay only your fixed personal amount per order.

Plan Ahead for Your Delivery

Medications are fulfilled via home delivery only. Allow time for pharmacy processing and shipping.

Return to Your Dashboard

Return to your Member Dashboard to add the required personal funds to your RxSaveCard before using it at checkout. You can also view your virtual RxSaveCard details here (card number, expiration, and security code) when you place your order.

Need Help?

For questions about prescribing, dosages, side effects, delivery status, or medication availability, contact your chosen pharmacy directly. For questions about your RxSaveCard account, how to use your card, or how your GLP-1 program works, contact RxSaveCard Support.

Frequently Asked Questions

LillyDirect/Zepbound

How do I get my prescription to LillyDirect?

Your doctor must send the prescription electronically to [LillyDirect Pharmacy](#), using the routing and **exact product wording** LillyDirect currently publishes for your prescribed format (**Zepbound vial** vs. **KwikPen** can differ). If your doctor needs help, they can call LillyDirect at [844.559.3471](#).

Does the KwikPen require a new prescription?

Yes. The **Zepbound KwikPen** is a different product format from the vial and requires a separate prescription from your prescribing provider. Your existing vial prescription cannot be used for KwikPen fulfillment, and providers will not automatically convert it. If you'd like to switch, contact your doctor to request a new script specifically for the KwikPen.

Which forms of Zepbound are covered?

RxSaveCard supports Zepbound **vials** through [LillyDirect's Self Pay path](#) and **KwikPen** through LillyDirect or [Amazon Pharmacy](#). The **Zepbound Auto-Injector** may appear at [LillyDirect](#) and [Amazon Pharmacy](#), but it is **not offered** through this program and is **not eligible** for purchase with RxSaveCard. Available strengths and formats can change over time — check [LillyDirect for Zepbound](#) for the latest eligible options, and discuss alternatives with your doctor if your dose or format isn't currently available.

What if my doctor prescribes a different dosage of Zepbound?

Available Zepbound vial and KwikPen strengths through LillyDirect can change. Check [LillyDirect Pharmacy](#) for the current options, and ask your prescriber about alternatives if your dose or format isn't listed.

Why did I get a text message from GiftHealth Pharmacy?

[LillyDirect](#) has partnered with [GiftHealth Pharmacy](#) to handle shipment and delivery of your prescription. Their message will walk you through the next steps to receive your medication.

What is the self-pay only pharmacy fulfillment option for LillyDirect?

Some Lilly medications are only available through self-pay and cannot be billed to insurance. [LillyDirect](#) offers this option to provide affordable direct access to these medications. Your RxSaveCard works for self-pay purchases, since it gives you access to cash prices outside of traditional insurance.

What if I haven't received a text or email confirming my prescription?

It typically takes 2–3 days for [LillyDirect](#) to process a prescription. If you haven't heard from them by then, double-check that your healthcare provider has your current phone number and email address on file. If the issue persists, contact LillyDirect support at [844.559.3471](#).

My provider sent my prescription to LillyDirect. Why haven't I received a checkout link?

[LillyDirect](#) reviews each prescription before issuing a checkout link to make sure everything is accurate. This process usually takes 3–5 business days. You'll receive a text or email with your checkout link as soon as it's ready.

Do I need to add injection supplies to my order?

Injection supplies are not automatically included with **Zepbound vials** and can be added at [LillyDirect](#) checkout. **Zepbound KwikPen** is a self-contained auto-injector — follow the prompts in your LillyDirect order flow for any additional supply options.

What is the cost to have my medication shipped to my home?

[LillyDirect](#) currently offers free shipping through their third-party providers. Shipping costs may change in the future — any applicable fees will be displayed at checkout.

How long does it typically take to receive my medication?

We recommend allowing about a week from when your doctor sends the script to when you receive your medication — this covers prescription processing, checkout, and delivery.

Can I use my RxSaveCard to buy the Zepbound Auto-Injector?

No. The **Zepbound Auto-Injector** may appear at [LillyDirect](#) and [Amazon Pharmacy](#), but it is **not offered** through this program and is **not eligible** for purchase with RxSaveCard.

Who do I contact if I have questions about my LillyDirect order?

[LillyDirect](#) works with licensed dispensing partners to fill and ship self-pay orders; the specific pharmacy on your order may vary. Use the support options in your checkout flow and the contact details in your order confirmation email—those are the fastest way to reach the team handling your shipment.

NovoCare/Wegovy

What is NovoCare Pharmacy?

NovoCare Pharmacy is Novo Nordisk's direct-to-patient pharmacy that provides access to **Wegovy** (pen or pill) outside of traditional insurance. Through RxSaveCard's weight management program, Wegovy is delivered directly to your home with Atlantic Packaging's contribution applied to reduce or eliminate your out-of-pocket cost.

How do I get my prescription to NovoCare?

Your doctor must send the prescription directly to **NovoCare Pharmacy** using the routing details in **NovoCare's Wegovy instructions** for your product. Make sure your doctor specifies the correct product — Wegovy pen or pill — along with the intended dose. If your doctor needs assistance, they can call NovoCare at **(833) 949-5527**.

What information does NovoCare need to reach me?

Make sure your healthcare provider includes your current email address and mobile phone number when submitting your prescription to **NovoCare Pharmacy**. NovoCare uses these to send confirmation and next-step communications.

How will I know my prescription was received?

After your provider submits your prescription to **NovoCare Pharmacy**, you'll receive a welcome text to the phone number on the prescription.

Why did I get a text from CoAssist or CenterWell Pharmacy?

NovoCare has partnered with CoAssist and CenterWell Pharmacy to handle shipment and delivery. Their message will walk you through the next steps to receive your medication.

What is the cost to have my medication shipped to my home?

NovoCare Pharmacy currently offers free shipping. Any future changes to shipping costs will be displayed at checkout.

How long does it typically take to receive my medication?

We recommend allowing about a week from when your doctor sends the script to when you receive your medication — this covers prescription processing, checkout, and delivery.

Amazon Pharmacy/Foundayo

Which GLP-1 medications can I get through Amazon Pharmacy?

Amazon Pharmacy is a newer addition to the RxSaveCard GLP-1 program and carries several covered medications, including **Wegovy** (pen and pill), **Zepbound KwikPen**, and **Foundayo** (orforglipron). Zepbound **vials** are fulfilled through LillyDirect, not Amazon Pharmacy. Foundayo is currently only available through Amazon Pharmacy within this program. The **Zepbound Auto-Injector** may appear at **LillyDirect** and **Amazon Pharmacy**, but it is **not offered** through this program and is **not eligible** for purchase with RxSaveCard. Availability and pricing can vary — check **Amazon Pharmacy**.

Does my doctor need to send my prescription differently for Amazon Pharmacy?

Yes. If you want your medication fulfilled through **Amazon Pharmacy**, your doctor needs to send the prescription directly to **Amazon Pharmacy** — not **LillyDirect** or **NovoCare Pharmacy**. For prescriber routing and how prescriptions are handled, see **Amazon Pharmacy: How it works**. If your doctor needs help, Amazon Pharmacy can be reached at **855-206-3605**.

Is Foundayo only available through Amazon Pharmacy?

Yes, **Amazon Pharmacy** is currently the only approved fulfillment path for **Foundayo** within the RxSaveCard program.

How do I pay with my RxSaveCard at Amazon Pharmacy?

At **Amazon Pharmacy** checkout, select **Buy without insurance** first (RxSaveCard only works on the self-pay path). Then enter your RxSaveCard virtual debit card information (card number, expiration date, and security code) just like any other card payment. Amazon may try to apply a default payment method if you have one associated with your Amazon account, so make sure your RxSaveCard is the payment method selected. If you need to cover the balance above your employer contribution, see **How to add personal funds** (split pay).

Why do my Amazon Pharmacy taxes and fees look different from LillyDirect or NovoCare?

Pricing can vary between pharmacies due to differences in channel pricing, promotions, and state-level tax rules. **Amazon Pharmacy** may charge additional tax on medications depending on your state, which can affect the total cost compared to **LillyDirect** or **NovoCare Pharmacy**. We recommend reviewing the full checkout total — including any taxes or fees — before completing your purchase.

How long does it take to receive my medication from Amazon Pharmacy?

Delivery timelines at **Amazon Pharmacy** depend on when your prescription is received and processed, typically 1–2 business days after your doctor sends it. **Amazon Prime** members receive free 2-day delivery. Overall, allow about a week from when your doctor sends the script to when you receive your medication.
